Tom, worthwhile to read this. FYI. Air level was raised to 50 ug (not mg/kg as CCAEJ states) because PCB concentration currently on site is lower than earlier. I read an article earlier where DTSC Geologist stated that they haven't detected PCBs in air. The CHHSL number cited in the article (0.089) has been withdrawn by OHHEA. They are now using 0.22 ppm.

PS. I asked Sara to follow on the other site mentioned in the story.
